NEWS

Safeguarding & Prevention policies

We believe that sport is not only about participation and performance, but also about creating safe, respectful, welcoming and inclusive environments for everyone.

For this reason, MSV has formally adopted its Safeguarding and Prevention Policies, together with the Organisational, Management and Control Model for Sports Activities, in accordance with Article 16(2) of Italian Legislative Decree No. 39/2021.

This is more than a legal requirement: it is a concrete commitment to preventing harassment, violence and discrimination, while protecting minors and vulnerable people.

Through this step, MSV strengthens its commitment to making sport a place where everyone can participate, feel respected and feel safe. This commitment has also been recognised through the Erasmus+ Sport project Halt4Kids.

ONGOING PROJECTS

Saving Lives: First Aid for Sport Teachers and Coaches

In 2026, Saving Lives begins as a new European project bringing together partners from Italy, Spain and Romania.

The project will strengthen the skills of coaches and Physical Education teachers in first aid and emergency response, with a focus on football and young athletes.

Through training and the exchange of good practices, Saving Lives promotes a stronger culture of health, prevention and safety in sport.

For MSV, sport is not only about physical activity — it is also about protecting people and creating safer environments for everyone, especially children and young athletes.

MSV NEWS

MOVEUP - walking sports

MoveUp is a program dedicated to improve the well-being and physical health of people living with chronic conditions.

Through personalized physical activities and sports, such as catchball, walking basketball and walking football; the participants are supported by specialized trainers and qualified medical professionals.

SPECIALRACKET - badminton for all

The project promotes social inclusion of children and youth with special needs through sport and in particular through adapted badminton.

Some of the outputs of this project are “Research of sports training modules/tools and programs for children and youth with special needs” and a “Training guide for parents and relatives of children and youth with special needs”.

BEST PRACTICES

GOLFTEGRATION – Inclusive Golf

Through the GOLFTEGRATION Erasmus+ Sport project, MSV is developing an inclusive methodology that uses golf and Pitch & Putt to promote physical activity, social interaction and wellbeing.

During the TPM in Bari in June 2026, people living with Alzheimer’s disease took part in adapted golf activities, while coaches and sports professionals participated in practical training on inclusive teaching methods.

The experience showed how adapting activities and teaching approaches can make sport more accessible, supporting participation, self-confidence and social inclusion.

A simple methodology with a clear message: sport can be adapted to people, not people to sport.
